

Programme

(subject to alterations)

Are you professionally or in an honorary capacity involved in the **planning and realization of projects** supported by the EU?

Or would you like to receive **EU development funds** for an own project?

Have you perhaps already tried to, but been unsuccessful because of various reasons?

Are you, in addition to that, interested in economically, politically or culturally bringing forward the **Danube region** as a common living space from the Black Forest around the source of the Danube to the Danube Delta beside the Black Sea?

Then the **qualification project** “Gaining with Training” can possibly offer you a valuable help.

“Gaining with Training“ has been conceived by three specialised non-profit organizations in Baden-Württemberg.

It consists of a very practically orientated **training module**, which contains valuable hints for EU applications, for EU project management and for the EU Strategy for the Danube Region. Besides, the training is followed by a **coaching phase** lasting several months during which permanent advice and help is provided for the participants throughout their own real project preparation phase.

The organizers' aim is to initiate and/or escort as many concrete projects as possible in the context of the EU Strategy for the Danube Region.

All participants will receive a certificate for their participation in the qualification measure. On request, participants receive support for their

own partner requests in other countries of the Danube Region. There will also be help and advice after the training session is finished in the frame of a “coaching phase”.

Contents of the training module

- Basics of EU funding
- Goals, contents and guidelines of the EU Strategy for the Danube Region
- Best practice of transnational cooperation in Europe
- Specific funding programmes of the EU
- Know-how in project cycle management
- Preparation/further development of specific project plans

[For details visit: <http://www.danubecc.org>]

Coaching phase

- Following the training module: (several weeks) on request: advice by the organizers' coaching team concerning all problems appearing during the realization of the specific project planned without additional costs.

Organization and management of the training module:

Boris Čamernik, Secretary General, DCC Belgrade
Sabine Meigel, manager of the Donaubüro Ulm
Dr. Joachim Beck, director of the Euro-Institut Kehl
Florian Setzen, director of the Europa Zentrum Baden-Württemberg

**Deadline for applications:
21.09.2012**

Further important information:

Please add a 2-pages description of a project idea or an existing project which you want to realize under the EU Strategy for the Danube Region to office @danubecc.org
